Call within the new Priority Programme of the DFG "Machine Learning in Chemical Engineering" published

16.09.2020 - The DFG has published a call within the new Priority Programme SPP 2331 "Machine Learning in Chemi Engineering" with the CDS board member Prof. Sebastian Sager in the programme committee. Applications tandem proposals for a first 3-year funding period can be submitted until January 19, 2021. The proposals should address a to at the interface between chemical engineering and machine learning. Possible topics include opimal decision making, da heterogeneity, information and knowledge representation, creativity, etc.

› to the call for proposals of the German Research Community (DFG)
