New Sino-German cooperation project MPI, OvGU and East China University

17.04.2019 - CDS scientists are involved in the new international cooperation between the Max Planck Institute Magdeburg, Otto von Guericke University Magdeburg and the East China University of Science and Technology Shanghai. The cooperation project is led by CDS spokesperson Prof. Dr.-Ing. Kai Sundmacher, among others.

The aim is to extract valuable natural components such as vitamin E from liquid mixtures from vegetable oil production in China and other countries - with the help of so-called strong eutectic solvents.
