Forschungszentrum  
Dynamische Systeme

# Magdeburg Centre of Systems Biology (MaCS)

Seminar

**Unraveling protein-protein interactions in health  
and disease**

**Monday, 25.11.2024, 15.00**

Room 027, Building 28/Pfälzer Platz 2, Uni Campus

**Prof. Dr. Kakoli Bose**

Principal Investigator at the Cancer Research Unit of  
Tata Memorial Centre, India

---

Prof. Dr. Bose has been working in the field of biophysics, biochemistry, proteolytic enzymes and protein-protein interactions biology since her PhD, in several countries including USA and India. In particular, she has a strong focus in understanding protein-protein interactions using structural biology. Furthermore, she has a profound expertise in structural and functional biochemistry as well as drug design. She is a biomedical scientist working in the area of apoptosis and associated diseases such as cancer and neurodegeneration. Her latest studies will be presented.
